PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Java, Python, Data Structures, Operating Systems, and Computer Networks. Passionate about software development and problem-solving, with hands-on experience building academic and personal projects. Seeking an internship opportunity to apply technical skills while learning in a collaborative engineering environment.

EDUCATION

BMS College of Engineering | Bangalore

Oct 2024 - Jul 2028

Bachelor of Engineering in Computer Science and Data Science

CGPA : 8.85

PROJECTS

URL Shortner | 🐙 Github 🌐 Website

- Built a **RESTful URL Shortening Service** using **Node.js**, **Express.js**, and **PostgreSQL**, with **JWT-based authentication** and **bcrypt password hashing** for secure user access.
- Developed **CRUD REST APIs** for **URL creation, management, automatic redirection**, and **click analytics**, enabling efficient tracking of shortened links.
- Designed and optimized a **PostgreSQL** database with **indexes** for faster URL lookups and implemented **URL expiration** functionality to automatically invalidate expired links.
- Structured the backend using the **MVC (Model–View–Controller) architecture**, improving **code maintainability, scalability**, and separation of concerns.

Technologies / Tools Used : Node.js, Postgressql, Express

Go Moto | 🐙 Github 🌐 Website

- Developed a **full-stack ride booking platform** with secure user authentication, ride search, booking management, and responsive UI.
- Implemented **JWT-based authentication and authorization**, enabling secure login, registration, and protected user routes.
- Built a modern frontend using **React**, **TypeScript**, **Vite**, and **Tailwind CSS**, emphasizing reusable components and responsive design.
- Designed and integrated **RESTful APIs** with Express.js and PostgreSQL for user management, ride bookings, and real-time data handling.
- Optimized database performance using **PostgreSQL relationships and indexing**, ensuring efficient retrieval of booking and user information.
- Deployed the application on **Vercel** with production-ready configuration and version-controlled development using Git and GitHub.

Technologies / Tools Used : React, Express, Node.js, MongoDB

SKILLS

Programming Languages : C, C++, Java, Python, JavaScript

Frameworks & Libraries : React, Node.js, Express

Tools & Platforms : Git, GitHub, Docker, Postman, Linux

Databases : MySQL, MongoDB
